Profile Summary

- AI-focused Computer Science undergraduate with strong foundations in **C++**, **Data Structures**, and **Object-Oriented Programming**.
- Experienced in building automation tools, including a **Desktop AI Assistant** and a **Smart Expense Tracker System**.
- Hands-on experience developing full-stack web applications using **React**, **Node.js**, **Express.js**, and **MongoDB**.
- Passionate about developing intelligent software solutions and solving real-world problems through code.

Relevant Coursework

- Data Structures
- Object-Oriented Programming
- DBMS (Basic)
- Operating Systems (Basic)
- Algorithms
- System Design

Hackathon Experience

Smart India Hackathon (SIH) 2025 | National Level Participant 2025

- Cleared the **2nd round** and secured a place among the **Top 100 teams** at the national level.
- Collaborated in a team-based problem-solving environment and contributed to **solution design** and technical planning.

TechTraid Hackathon | Organized by HackuVerse 2025

- Participated in a competitive hackathon, collaborating with a team to design and build a **solution prototype** under time constraints.

Google Solution Challenge | Organized by Hack2Skills 2025

- Contributed to ideation and development of a solution addressing real-world **sustainability/community challenges** as part of a team.

Projects

OrganicStore – Organic Produce E-Commerce Platform | React, Vite, Tailwind CSS, React Router DOM | [Live Site](#) 2026

- Built a fully responsive e-commerce platform with product catalog, **advanced filtering, search, and sorting** across multiple product categories.
- Implemented a persistent **shopping cart using React Context API**, along with a complete checkout flow including address form and payment method selection.
- Designed multi-page navigation with React Router DOM, including Home, Shop, Product Detail, Cart, Checkout, About, and Contact pages.

Job Board Portal | React.js, Node.js, Express.js, MongoDB | [Live Site](#) 2026

- Developed a full-stack job board platform enabling users to **browse, search, and apply for jobs** with resume upload support.
- Built an **employer dashboard** for managing job postings and viewing applicants, secured using **JWT authentication**.
- Deployed frontend on Vercel and backend on Render, with MongoDB Atlas as the database.

Desktop AI Assistant (C++) | C++, STL, System Calls | Link Coming Soon 2025

- Developed a voice/text-based assistant to **launch applications and websites** through natural user commands.
- Implemented **command recognition using string parsing and system calls** to automate routine desktop tasks.

Technical Skills

Programming Languages: C++, Python, C

Core CS: Data Structures & Algorithms, OOP, DBMS (Basic), Operating Systems (Basic)

Technologies/Frameworks: React.js, Node.js, Express.js, MongoDB, Git, GitHub, VS Code

Education

GL Bajaj Institute of Technology and Management

Aug 2024 – Present

B.Tech – Computer Science Engineering (Artificial Intelligence)

Gorakhpur, Uttar Pradesh

Extracurricular / Certifications

- AWS Cloud Foundations – **Certification Course**
- Introduction to Cloud Computing – **Microsoft Learn Badge**
- Introduction to Artificial Intelligence – **Simplilearn SkillUp Certification**
- Volunteer – **NCQC 2025 (College Level)**: Assisted in coordination, logistics, and smooth event execution.
